

## Press Release

### **Galileo Group's CONIGMA™ CCM Achieves “Powered by SAP NetWeaver®” Status**

*Seamless integration of CONIGMA CCM with SAP NetWeaver platform and SAP® GUI leads to highly automated, efficient IT processes supporting IT compliance initiatives.*

**Las Vegas, October 3, 2007** – The Galileo Group AG, one of the leading suppliers of software solutions for application and transport management for use with SAP® applications, today announced that its Conigma™ CCM (3G) 3.20 has achieved “Powered by SAP NetWeaver®” status. Conigma CCM integrates administration and business processes for seamlessly developing, adapting and customizing SAP solutions with existing IT support infrastructure, such as procedures for allocating software.

Conigma CCM allows customers to define and enforce standardized, unified, audit-proof and well-documented processes for incident-, change-, release- and configuration management of SAP solutions being used by developers, consultants and implementation partners. Conigma CCM also supports synchronizing development and operational processes independent of technologies used (ABAP™, JAVA) and manage transports of SAP data across an advanced system landscape with many instances of SAP applications in use. Powerful reporting functionalities help ensure a consistent view about the current status and progress of business requests, change orders, releases planned and many other aspects, helping to guarantee a complete and current overview of all activities within an SAP solution-based environment at any time.

“Our Conigma CCM product enables organizations using SAP applications to achieve the highest level of efficiency with regard to their IT processes, managing change, configuration and updates of their systems,” said Malte Klassen, CEO at Galileo Group AG in Munich/Germany. “Due to powerful authorization and workflow functionalities, a complete audit-trail and integrated reports, our

customers also get a crucial tool to implement and support their IT compliance initiatives.”

The SAP NetWeaver platform powers the SAP Business Suite family of business applications, SAP xApps™ packaged composite applications and solutions such as Conigma CCM 3.20 from Galileo Group. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration. Third-party ABAP Add-ons such as Conigma CCM 3.20 that have passed the syntactic and semantic checks that are part of the SAP ABAP Add-on certification requirements are eligible to receive certification through the SAP Integration and Certification Center.

"Achieving Powered by SAP NetWeaver status for Conigma CCM provides validation to our prospects and customers that our solution can be implemented and deployed quickly without significant changes within their SAP application-based infrastructure," added Josef Huber, Vice President of Sales and Marketing at Galileo Group.

Today's announcement was made at TechEd '07 Las Vegas, SAP's largest technical education conference.

### **About the Galileo Group AG**

The Galileo Group AG is one of the leading providers of Application and Transport Management solutions for use with SAP applications. The Conigma suite integrates administration and processes for seamlessly developing, adapting and customizing SAP solutions with existing IT support infrastructure, such as procedures for allocating software (ABAP, TMS and Java CMS). This results in significant rationalization potential based on the more efficient, automated development and change processes. In addition, IT compliance initiatives are given optimal support by means of wide-ranging workflow functionalities and the detailed recording of all procedural steps.

The clients of Galileo Group include LSV (Landwirtschaftliche Sozialversicherung), Postbank, Siemens AG and Züricher Kantonalbank. Galileo Group AG may be found in the Internet under <http://www.galileo-group.de>.
