

## Press Release

### **Conigma™ now available also for UNIX and Linux desktops**

*Integration with “SAPgui for Java” allows to use the SAP® Change-, Release- und Transport management solution Conigma™ now also on UNIX and Linux desktops*

**Munich, February 5, 2009** - Galileo Tools GmbH, one of the leading suppliers of software solutions for SAP® Change-, Release and Transport Management announces today, that Conigma is available immediately also for SAP desktops running Linux or UNIX operating systems, as Conigma has been integrated with SAPs user interface “SAPgui for Java”. Additionally, using SAPgui for Java, all functionality of Conigma may now be used fully integrated into other web applications, i.e, a portal or a web based enterprise change management system.

„There is a growing number of organizations, in particular public accounts, following a pure open source strategy and consequently using Linux on their desktop systems. Many of these organizations are using and operating also SAP to control and monitor their business processes. With the new version of Conigma we are able to provide also such organizations with a powerful solution“, said Josef Huber, General Manager of Galileo Tools GmbH.

#### **The Conigma Suite**

In addition to the core product, Conigma CCM, the Conigma Suite comprises additional modules - Conigma QCOPY and Conigma DEVSYNC – which can also be licensed as individual products. The Conigma Suite enables SAP customers to significantly improve their IT processes for maintenance, development and operation of SAP resulting in higher productivity, lower costs and full compliance. At the same time, the quality of SAP Changes as well as the

availability of SAP systems is raised. The Conigma Suite focuses on three areas: the automation of Change, Release and Transport Management processes for SAP (also taking into account compliance requirements in complex, parallel SAP landscapes); the integration of SAP Change, Release and Transport Management processes with Software Change and Configuration Management (SCCM) tools and helpdesk solutions within the client's company; and the automation of recurring tasks within SAP's basis technologies.

### **About Galileo Tools GmbH**

Galileo Tools GmbH, a subsidiary of the Galileo Group AG, is one of the leading providers of Change-, Release- and Transport-Management solutions for SAP®. The Conigma™ suite integrates administration and processes for adapting and customizing SAP software seamlessly with existing IT support infrastructure, such as SAP procedures for allocating software (ABAP TMS and Java CMS). These results in significant rationalization potential based on the more efficient, automated development and change processes; in addition, IT compliance initiatives are given optimal support by means of wide-ranging workflow functionalities and the detailed recording of all procedural steps.

The clients of Galileo Tools include LSV (Landwirtschaftliche Sozialversicherung), Postbank, Siemens AG and Züricher Kantonalbank. More information about Galileo Group AG may be found in the Internet under <http://www.galileo-group.de>.
