Galileo Group on shortlist in the ALM-athon

München, October [12], 2022 – Galileo Group AG, a leading software provider for turnkey integrations for IT factories and for release, change and transport management for SAP® solutions, today announced that it is a finalist among the top companies of this year's ALM-athon. The hackathon, organized by SAP, takes place in the run-up to the SAP ALM Summit EMEA from 18 to 22 October in Mannheim, Germany. A jury of SAP experts has chosen the Galileo Group's solution approach, which is based on the Conigma Connect™ integration platform, for its shortlist.

"We were all very impressed by the professional pitches, great ideas, and solutions that our partners have developed over the last few months. A really great achievement," said David Birkenbach, Director ALM Go-to-Market EMEA and MEE of SAP SE.

For the hackathon, SAP partners were posed with the question, "How can partner solutions or third-party integrations benefit customers by extending SAP Cloud ALM with standard APIs?" A total of six SAP partners will present their solutions as finalists at the SAP ALM Summit EMEA. The winner will be chosen on-site by the participants.

With the submitted proposal, the Galileo Group helps to show businesses that use SAP® technologies an easy way into the hybrid application lifecycle management (ALM) world, marrying cloud and on-premises. Using a model IT factory, it is demonstrated how tools for IT service management, for project and program management, for the analysis and visualization of data as well as for test automation with the Conigma Connect software enable a streamlined hybrid ALM. In this example, the following products are integrated: SAP Cloud ALM, implementation of change request management with SAP Solution Manager ChaRM, Microsoft Azure DevOps / Atlassian Jira, Tricentis Testim and Grafana. This allows companies to continue using their tools while easily entering the world of SAP Cloud ALM. [Conigma Connect™](#) also works with SAP S/4HANA® and SAP Solution Manager and is available on [SAP® Store](#).

About Conigma Software

The Conigma™ software suite is composed of several solutions. The core is formed by Conigma CCM for controlling and managing IT processes for change, release and transport management for SAP solutions and Conigma Connect for integrating all SAP® and third-party tools in the IT factory. The suite also includes the products Conigma QCopy for software recovery from SAP system copies, Conigma DevSync for synchronisation of parallel SAP development systems and Conigma4Eclipse for integration of functionalities in ABAP in Eclipse. The analysts at Research in Action (RIA) have listed the Cognima software suite as Market Leader in the Vendor Selection Quadrant in the "Vendor Selection Matrix™ SAP-Centric ALM SaaS And Software".

About Galileo Group

The Galileo Group AG is a leading software provider for Application Lifecycle Management (ALM) in the SAP® environment as well as turnkey integrations for IT factories focusing on SAP technologies. The Conigma software suite also includes solutions for the integration of SAP and third-party tools in the IT factory, recovery from SAP system copies, synchronisation of parallel SAP development systems and integration of functionalities in ABAP in Eclipse.

The Galileo Group is a partner of SAP and Microsoft. Numerous medium-sized companies and international corporations, including Fortune 500 and DAX30 companies, choose Galileo Group as a reliable partner. The owner-managed company, founded in 2000, has a branch office in Switzerland in addition to its headquarters in Munich. For more information, please visit www.galileo-group.de.
