

## SEPTEMBER 2018

### Conigma™ Extension for ABAP in Eclipse

#### > Conigma™ advantages also in the Eclipse IDE soon

**Munich, Sept. 17, 2018** - Galileo Group AG, one of the leading providers of software solutions for SAP change, release and transport management, announces the availability of the new Conigma™ Extension for ABAP Development Tools / SAP ADT in October.

The extension of Conigma™ in Eclipse provides important functions for all ABAP developers in the Eclipse IDE, such as the assignment of transports to changes or the extended dependency check. The proven Conigma™ functions are conveniently accessible via toolbar shortcuts, project context menus or editor context menus.

"The Conigma™ Extension for ABAP in Eclipse enables us to further expand our excellent market positioning," says Tino Engel, Head of Development at Galileo Group AG. "In this way, we support the unparalleled agility and unique dynamic of our SME customers as well as the DAX 30 corporations". "This is another building block for customers with affinity for the SAP Cloud Platform (SCP)," adds Malte Klassen, CEO of Galileo Group AG.

The Conigma™ Extension for the ABAP Developer Tools is provided for both latest Eclipse releases (currently Eclipse Oxygen and Eclipse Photon) and can be used flexibly via rental licenses.

#### About Conigma™

In addition to the core product Conigma™ CCM for controlling and managing IT processes for SAP Change, Release and Transport Management, the Conigma™ Suite includes further automation modules: Conigma™ QCopy automates software recovery to SAP system copies;

## SEPTEMBER 2018

Conigma™ DevSync enables automated synchronization of parallel SAP development systems; the Conigma™ extension for Eclipse rounds off the portfolio.
