Conigma™ CCM Release 2019

> **A comprehensive package of enhancements and new features**

Munich, April 18, 2019 - Galileo Group AG, one of the leading providers of software solutions for SAP Change, Release and Transport Management, today presented Conigma™ CCM Version 2019. This version contains numerous in-depths enhancements at all levels of SAP Change, Release and Transport Management.

"The demands and ideas of our customers, which we have built into our new Conigma™, are impressive," says Malte Klassen, CEO of Galileo Group AG. " This resulted in a mid-three-digit number of improvements and corrections. With the new Conigma™ release, we have expanded and secured our leadership in software for the industrialization of SAP® IT processes and software distribution for a fairly long time."

Conigma™ CCM 2019

In the following, some Conigma™ extensions are described for the sake of an overview.

- **User experience** - Integrated use of Conigma™ CCM via ABAP in Eclipse / SAP ADT
- **Functional enhancement** - More flexible handling for Transport of Copies (ToC)
- **User experience** - Automatic restart of import jobs with automatic error correction in SAP Transport Management
- **Performance improvements** - For complex GUI representations
- **User experience** - Management of favorites now more flexible

APRIL 2019

- **User experience** - Improved filtering capabilities for cross-object analysis
- **Functional enhancement**- New SAP TMS object filters to check for critical objects during object collision checks for Workbench and Customizing objects
- **Administration** - improved historization with export options of Conigma™ customizing
- **User experience** - Enhancements to context menu determination within the repository browser
- **User experience** - New framework for integration of user documentation
- **User experience** - Email attachments for approvals via Conigma shortcuts
- **Performance improvements** - In the management of object locks
- **User experience** - Easier creation of audit reports

In addition to the core product Conigma™ CCM for controlling and managing IT processes for SAP change, release and transport management, the Conigma™ suite also includes Conigma™ QCopy for software recovery after SAP system copies, Conigma™ DevSync for synchronizing parallel SAP development systems and Conigma™4Eclipse for integrating our functionalities in ABAP in Eclipse (=SAP ADT) IDE.

About Galileo Group AG
